PERSONAL STATEMENT

During my career as a professional, I have extended my services in the field of healthcare as a healthcare provider. My aim is..... Further, I intend to expand the services towards the community, increasing the community participation and ensuring the equity of the services delivered. I am dedicated towards the improvement of the healthcare system in Sri Lanka at all levels, including human resources development. I believe that this is achievable at a national level by both the improvement of the standards of healthcare providers as well as a system improvement. In order to achieve this I have been working in innovative national policy development and implementation at the grass root level ensuring their sustainability.

In addition, I have been a visiting lecturer at the Nurses' Training School, School of Physiotherapists and School of Cardiography affiliated with the National Hospital of Sri Lanka.

Contribution To Issues Of National Interest

My Services To The Community

TSUNAMI RELATED CONTRIBUTION

The boxing day tsunami of 2004, resulted in unprecedented demands on the voluntary and healthcare sectors in Sri Lanka and other countries in the region. Acutely aware of my social responsibility at a time of national calamity, I took immediate steps to be involved in the rescue and relief activities. On request by the Commander of the Air-Force, within an hour of the disaster, I made a media statement in my capacity as the
